Proactive Business Sensors

All your business analysis through one interactive screen – Cargo Flash Dashboards!

All Cargo Flash systems have built in 'Visual Management Information System' which helps organizations communicate & align strategies and goals, monitor and adjust the execution of strategy, and deliver insights to all, giving ability to identify and correct negative trends.

The interactive and visual design of these dashboards helps the management in monitoring the business in totality. It enables them to evaluate the performance of its own and its patterns by reviewing the entire network data, which can be further drilled down to different levels such as Country, City, Sector, Branches, customer etc.

Data can be viewed in both tabular and graphical formats. User can also get important reports live through email and SMS at a pre-determined time.

Cargo Flash dashboards indicate key changes in the business model almost instantaneously, thereby assisting Managers in taking quick corrective action for optimum performance. Multiple dashboards can be easily created and customized too suit the needs of various stakeholders.
